### Experience

*Boston Medical Center, Boston, MA*  
Developmental and Behavioral Family Nurse Practitioner  
2007 - present

Conduct comprehensive assessments on children with a variety of communication disorders, autism, developmental delay, and social/emotional disorders. Conduct assessments and treat children with a range of behavioral problems and provide behavioral management strategies for parents. Conduct comprehensive assessments on school-aged children with a variety of learning disorders and behavioral difficulties observed at home and school.

Mindfulness clinic designed for children with attention deficit hyperactivity disorder, anxiety and autism. Use the Alert Program with parents to help recognize self-regulation strategies for their children.

Clinical liaison for Department of Developmental and Behavioral Pediatrics  
Responsibilities include interviewing medical students and administrative assistants to work in our division, facilitating monthly meetings with administrative assistants to trouble shoot clinical flow issues, and to address any barriers between the administrative assistants and clinicians.

Fellowship with training specific to autism spectrum disorders  
Responsible for conducting a comprehensive assessment on children, aged 1-18 years, with communication and behavioral difficulties suggestive of Autism Spectrum Disorder. Standard of care ADOS (autism diagnostic observation scale) training.  
2008 - 2009

*Children's Hospital, Boston, MA*  
Gastroenterology Nurse Practitioner  
2003 - 2007

Employed in the Gastroenterology clinic providing care to patients across the life spectrum with a variety of gastrointestinal illnesses. Responsibilities include intake histories, providing physical exams, and applying skills to properly diagnosis and treat patients.

Coordinator of the C.U.B. program. This is a multidisciplinary program staffed with a gastroenterologist, urologist, neurosurgeon, and general surgeon. These providers utilize their expertise for patients diagnosed with anorectal malformations such as imperforate anus and cloacal exstrophy.

Co- Coordinator for the Center for Aero-Digestive Disorders. This is a Multidisciplinary program staffed with a gastroenterologist, otolaryngologist, and pulmonologist. My role was to manage the flow of the clinic and communicate with all the specialty groups.

Staff Nurse II  
Employed in the Otolaryngology clinic caring for infants, children, and adolescents with related diseases of the head and neck and communication disorders. Responsibilities include intake histories, pre and postoperative teaching,  
1998-2004

patient and family education and telephone triage. Act as liaison nurse among the Department of Otolaryngology and Department of Hematology by expediting abnormal lab results to the Hematology department for review.

#### Staff Nurse I

1996 – 1998

Worked as graduate nurse on orthopedic unit caring for infants to young adults with a wide range of medical, surgical, and social problems.
